

POLICY DOCUMENT

Medicine Policy

Procedures for the safe authorisation, storage, administration and documentation of medication.

Tiny Explorers prioritises the health and safety of every child in our care. This policy sets out how medication is authorised, stored, administered and documented while a child is at school.

01

General Guidelines

Authorisation

Medication is administered only with a signed Medication Authorization Form from a parent or guardian, detailing dosage, timing and specific instructions.

Prescription Medications

Must be in the original, clearly labelled container showing the child's name, dosage, prescriber, pharmacy, fill date and expiration.

Over-the-Counter Medications

Also require a Medication Authorization Form and original packaging labelled with the child's name.

Storage

Kept securely in a locked area inaccessible to children; refrigerated medications are stored in a dedicated refrigerator.

02

Administration

01 Designated staff only

Only staff trained in medication administration may give medication, following the authorization form and label.

02 Documentation

Every administration is logged with date, time, dosage and administering staff member; parents may access this log on request.

03 Timing

Medication is given at the specified times; any discrepancy prompts immediate contact with parents.

04 Missed doses

Parents are notified and the missed dose is documented; staff never administer a double dose to compensate.

EMERGENCY MEDICATIONS

"EpiPens and inhalers are kept accessible but secure."

Staff are trained to administer emergency medication promptly. Children with chronic conditions have an individualized care plan developed with parents and their healthcare provider.

03

Parent Responsibilities

Parents provide all medication properly labelled and within expiration, and update the school on any change to medication, dosage, or health condition. Remaining medication must be collected at year-end or when no longer needed; unclaimed medication is disposed of safely.

04

Exclusions & Liability

Tiny Explorers may decline to administer a medication deemed unsafe or beyond staff training, notifying parents to discuss alternatives. Herbal remedies, supplements and homeopathic treatments are not administered unless prescribed by a licensed provider with a completed authorization form. By submitting an authorization form, parents acknowledge the school's medication administration policies and assume responsibility for outcomes of administration performed as directed.
